## Åouastrong <br> Watering the life

Domestic Pumps

AQUASTRONG Co.,Ltd

## About us

AOUASTRONG was established in 1990s as a global water pumps provider based in Italy, develops and sells pumps for house,garden, agriculture and commercial applications.

Nowadays AQUASTRONG's strategy enables it to supply best price/performance ratio pumps with the process of controlling and monitoring quality starting from R\&D, throughout manufacturing, marketing, sales, and after saler service.

As a trusted name that is highly appreciated by customers to serve their needs better than similar products available in the market, and is recognized for transparency in business relationship.

## Our mission

To be recognized pump brand that offers clients a comprehensive ranges of high quality pumps of international standards and that suits the needs of customers in the world, and support these products with an after sale service according to our warranty policy.

## Our values

The core values of AQUASTRONG stem from the cerdibility of its products and relations with its clients. This credibility is evident in the careful control of product's standard, reliability, warranty and development. It also embraces our commitment of transparency and honesty in dealing with all stakeholders.

## CONTENTS

- PERIPHERAL PUMPS

P01-09

- CENTRIFUGAL PUMPS P10-22
- JET PUMPS
- stainless steel centrifugal pumps

P30-35

- GASOLINE/DIESEL WATER PUMPS
- POOL AND SPA PUMPS P50-51
- GARDEN PUMPS
- SUBMERSIBLE PUMPS
- stainless steel submersible sewage pumps P68-79
- SUBMERSIBLE BOREHOLE PUMPS
- SUBMERSIBLE PUMPS P104-123
- STANDARD CENTRIFUGAL PUMPS
- CIRCULATION PUMPS

## PUMP

- Submersible peripheral pump
- Special anti-rust treatment for cast iron pump body

Max. fluid temperature: $+35^{\circ} \mathrm{C}$
Max. immersion depth: 5 m
Liquid PH value: $6.5-8$
Maximum sand content: $1 \%$

- Maximum solid diameter: 0.2 mm

## MOTOR

Motor with copper winding

- Insulation class: F
- Protection class: IPX8

| MODEL | POWER |  | OUTLET | MAX.FLOW (Umin) | MAX.HEAD <br> (m) | $\begin{aligned} & \text { MAX } \\ & \text { IMMERSION } \\ & (\mathrm{m}) \end{aligned}$ |

##  <br> ENm

## PUMP

- Transfer of clean water or non-aggressive liquid
- Special anti-rust treatment for pump body and support
- High fow and medium/low head meet industrial
and agricultural demand
- Max. liquid temperature: $+40^{\circ} \mathrm{C}$
- Max. suction: +8 m

## MOTOR

- Copper winding
- Built-in thermal protector for single phase motor
- Insulation class: $F$
- Protection class: IPX4
- Max. ambient temperature: $+40^{\circ} \mathrm{C}$

## Application

- To transfer clean water with liquid temperature between $0^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$
- Application in water supply and drainage for factories, mines, municipal facilities as well as field irrigation, ect

## Features

- 4-stroke gasoline engine power performance, structural optimization and upgrading
- Ignition more convenient, more complete combustion, low energy
consumption, more environmentally friendly
- Strengthened pump body ensures more durable and relicalbe service
- Better sealing effect by using special mechanical seal
- Impeller designed with high efficient hydraulic system

## Pump

- Anti-rust cast iron impeller and diffuser
- Max.suction: $5 \mathrm{~m} / 120 \mathrm{~s}$
- Inlet/outlet: 38 mm

## Engine

- Single cylinder,4-stroke,Air-cooled
- Max.power: 3 HP
- Displacement: 87 cc
- Rated speed: 3600 rpm

Identification Codes

## Application

- To transfer clean water with liquid temperature between $0^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$ - Application in water supply and drainage for factories, mines, municipal facilities as well as field irrigation, ect

## Features

- Strengthened pump body ensures more durable and reliable service
- Better sealing effect by using special mechanical seal
- 5-direction outlet for convenient use
- Improved starter handle for easier starting
- $20 \%$ increased loading quantity thanks to very compact design
- Less gasoline consumption
as default, BS/Honda engine is optional

## Pump

- Anti-rust cast iron impeller and diffuser
- Anti-rust cast iron impeller and diffuser
- Max. suction: $5 \mathrm{~m} / 120 \mathrm{~s}$
- Inletloutlet: $38 \mathrm{~mm} / 50 \mathrm{~mm} / 80 \mathrm{~mm}$

## Engine

- Single cylinder, 4-stroke, Air-cooled
- Max. power: $3 \mathrm{HP} / 5.5 \mathrm{HP} / 6.5 \mathrm{HP}$
- Displacement: $87 \mathrm{cc} / 163 \mathrm{cc} / 196 \mathrm{cc}$

| EDP30-A | 36.2 | 485 | 435 | 550 | 244 |

## Application

- To transfer clean water with liquid temperature between $0^{\circ} \mathrm{C}$ and $40^{\circ} \mathrm{C}$ - Application in water supply and drainage for factories, mines, municipal facilities as well as field irrigation, ect

## Features

- Strengthened pump body ensures more durable and reliable service - Better sealing effect by using special mechanical seal
- 5 -direction outlet for convenient use
- $20 \%$ increased loading quantity thanks to very compact construction
design
Less gasoline consumption

## Pump

- Anti-rust cast iron impeller and diffuser
- Max.suction: 5 m
- Inlet/outlet: $2^{2 /} / 2^{\prime \prime}+2 \times 1.5^{\circ}$
- Electric starting

## Engine

- Single cylinder,4-stroke,Air-cooled
- Max.power: 8.4 HP
- Displacement: 418 cc
- Rated speed: 3600 rpm

EDP
Identification Codes
EDP 20 e-H

## APPLICATIONS

The XKP series of pool pumps is mainly used for water circulation \& filtration systems, such as

- Hot springs
- Small and medium-sized swimming pools
- Water treatment systems
- Landscape fountains
- Light industries

## PUMP

- Plastic pump body
- AISI 304 shaft
- Integrated pre-filter
- Quiet operation
- Max. liquid temperature: $+35^{\circ} \mathrm{C}$

## MOTOR

- Built-in thermal protector for single phase motor
- Insulation class: $F$
- Protection class: IPX5

## Control Box

- The device is specially designed for automatic water drainage in pump stations, elevator shafts, sewage pits, etc

## Features

- Liquid level control
- Excellent anti-interference performance
- The primary pump and standby pumps can be set arbitrarily

In case the primary pump is failed or water output is less than input, the standby pump(s) start to run automatically
Display of Power and Operating status

- Manual and automatic operation mode for selection
- Protection of earth leakage, overcurrent, overvoltage overheating and phase loss
- Audible and visual alarm

## Operating Conditions

- Ambient temperature: $5 \sim 40^{\circ} \mathrm{C}$
- Humidity: $\leq 90 \%$
- Operating voltage: $380 \mathrm{~V} \pm 10 \%$
- Ambient environment: Freedom from corrosive gases and/or conductive dust.

## Instructions

- DOL (Direct On Line): High starting current. Applicable for pumps with power up to 15 kW .
- Autotransformer Starter: Small starting current. Applicable for pumps with power more than 15 kW .
- Soft Starter: Smooth starting current with small influence on the grid. Applicable for pumps with power more than 15 kW .

## Applications

- Drainage of wastewater from the attenuation tank, purifying tank and
- Dewage tank in water treatment plant
- Drainage of waste water containing fibrous additives from leather

Sactorye mana

- Sewage management, accumulated water, septic tank, stock farm.
- Pumping sewage form hotels, restaurants, schools and public buildings

## Features

- High efficient and anti-clogging Enclosed Channel impeller design
- Hlexible installations with hoses, pipes or quick-coupling systems

Working Conditions

- Liquid temperature: $0-40^{\circ} \mathrm{C}$
- Max immersion depth: 5 m

## Motor

- Frequency/Pole number: $50 \mathrm{~Hz} / 2$
- Insulation class: F
- Protection class: IPX
- Mechanical seal: Double-end mechanical seals

Hose coupling as standard.
Flange elbow is available on request.)

## Applications

- Drainage of wastewater from the attenuation tank, purifying tank and sewage tank in water treatment plant
- Drainage of waste water containing fibrous additives from leather

Sewage management, accumulated water, septic tank, stock farm.

- Pumping sewage form hotels, restaurants, schools and public buildings

## Features

- Semi-open Vortex Impeller design, suitable for transfer of liquid containing impurities and long fiber substance
- Flexible installations with hoses, pipes or quick-coupling systems
- Flow switch included for single phase pump with motor power $\leqslant 1.1 \mathrm{~kW}$

Working Conditions

- Liquid temperature: $0-40^{\circ} \mathrm{C}$
- Liquid temperature: $0-40^{\circ}$

Motor

- Frequency/Pole number: $50 \mathrm{~Hz} / 2$

## Applications

- Used In pressure sewage system
- Drainage of wastewater from individual residences, apartment buildings,
recreational developments, models
- Transferring wastewater of commercial buildings, industrial plants,
- Schools, federal state and local parks,
- To transfer various wastewater and sewage

## Features

- The pump has a semi-open impeller design with a reliable grinding system.
- The large-diameter impeller generates a high pressure and the grinding system grinds solids into small pieces, which can be drained without clogging the pipes. - Flow switch included for single phas pump with anto-coupling system.

## Working Conditions

- Liquid temperature: $0-40^{\circ} \mathrm{C}$

## Motor

- Frequency/Pole number: $50 \mathrm{~Hz} / 2$
- Insulation class: $F$
Bearing: Ball type
- Mechanical seal: Double-end mechanical seals

## Applications

- Used In pressure sewage system
- Drainage of wastewater from individual residences, apartment buildings, recreational developments, models
- Transferring wastewater of commercial buildings, industrial plants,
mpling, small hospitals
- Schools, federal, state and local parks, wastewater drainage
- To transfer various wastewater and sewage

## Features

- The pump has a semi-open impeller design with a reliable grinding system.
- The large-diameter impeller generates a high pressure and the grinding system
grinds solids into small pieces, which can be drained without clogging the pipes
- The pumps can be connected to pipes directly or to an auto-coupling system.

Working Conditions

- Liquid temperature: $0-40^{\circ} \mathrm{C}$
- Max immersion depth: 5 m

## Motor

- Frequency/Pole number: $50 \mathrm{~Hz} / 2$
- Insulation class: $F$
- Bearing: Ball type
- Mechanical seal: Double-end mechanical seals

## Guide Rail System

- Suitable for pumps with flange conforming ISO7005-92 standard.
- Automatic engagement with flanged elbow

## Includes

Duck-foot bend
Guide hook
Flange connector
Upper guide support
Bolts and lock washers
(Foundation bolts and guide pipes are not included)

## Identification Codes

EDS 50-50

Pipe Diameter
Pump Outlet
LEO Product Style

WQ(D) $0.75-7.5 \mathrm{~kW}$

WQ 11 - 45 kW

## Application

Wastewater drainage in factories, construction sites and commercial
facilities

- Drainage system in municipal sewage treatment plants
- Drainage station in residential quarters
- Municipal projects
- Methane pools and field irrigation in countryside

## Pump

- Max. immersion depth: 5 m
- Max. liquid temperature: $+40^{\circ} \mathrm{C}$
- Liquid pH value: $6.5-8.5$
- Max. liquid density: $1.3 \times 10^{3} \mathrm{~kg} / \mathrm{m}^{3}$
- Water temperature: up to $35^{\circ} \mathrm{C}$
- Max.Immersion depth: 10 m
- Allowed by the particle diameter: $20-80 \mathrm{~mm}$

Motor

- Copper winding
- Protection class: IP6

Dimension

## Guide Rail System

- Suitable for pumps with flange conforming ISO7005-92 standard. - Automatic engagement with flanged elbow

## Includes

- Duck-foot bend
- Guide hook
- Flange connector

Upper guide support

- Bolts and lock washers
(Foundation bolts and guide pipes are not included)

EDH

## Application

- It is applicable to household water supply, equipment support, pipeline pressurization, garden watering, vegetable greenhouse watering, fish farming and poultry raising, industrial and mining, wate supply and drainage of enterprises and high-rise buildings, central air conditioner and centralized heating circulation system, etc.

## Pump

- AISI 304 shaft
- Max. liquid temperature: $+85^{\circ} \mathrm{C}$
- Altitude: up to 1000 m
- Max. suction: 8 m
- Max. inlet pressure: limited by max. operating pressure

## Motor

- Motor with copper winding
- Built-in thermal protector for single phase motor

Insulation class: $F$

## Application

- It is applicable to household water supply, equipment support, pipeline pressurization, garden watering, vegetable greenhouse watering, fish farming and poultry raising, industrial and mining, water supply and drainage of enterprises and high-rise buildings, central air conditioner and centralized heating circulation system, etc.

## Pump

- AISI 304 shaft
- Max. liquid temperature: $+85^{\circ} \mathrm{C}$
- Altitude: up to 1000 m
- Max. suction: 8 m
- Max. inlet pressure: limited by max. operating pressure

## Motor

- Motor with copper winding
- Buit in thermal protector for
- Insulation class: F
- Protection class: IP55
- Max. ambient temperature: $+40^{\circ} \mathrm{C}$

## Identification Codes

ECH (m) 10-30

- Single Phase (Three-phase without $m$ )

Stainless Steel Horizontal Multistage Pump

EST

## Application

- Circulation and transfer of clean, chemically
non-aggressive water and other liquids
- Water supply \& irigation
- Water circulation in air conditioning systems

## Operating conditions

- Delivery: up to $210 \mathrm{~m}^{3} / \mathrm{h}$
- Head: up to 100 m
- Liquid temperature

Standard: $-10^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$ Upon request: $-20^{\circ} \mathrm{C}$ to $120^{\circ} \mathrm{C}$

- Maximum operating pressure: 12 bar (PN12)

Anti-clockwise rotation when facing pump's suction port

- Impeller: AISI304/HT200
- Mechanical seal in compliance with DIN 24960
- Lubricated by internal recirculating pumped liquid
- Counter flange available on request

## Motor

- Closed construction, external ventilatio
- Insulation class: $F$
- Protection class: IP54
- Performance in compliance with CEI 2-3 (IEC 34.1)
- Max. ambient temperature: $+40^{\circ} \mathrm{C}$

## Construction features

- Single-impeller centrifugal pump featuring axial intake and radial discharge
- Inlet and outtet DN in compliance
with EN 733 (ex DIN 24255) and UN1 7467
- Flanges in compliance with UNI 2236 and DIN 2532 Rear entry (impeller, control valve and motor can be extracted without disconnecting the pump body from the pipes)

Rated Power ( $1 / 10 \mathrm{~kW}$ ) Extented Model
Impeller Nominal Diameter (mm Outlet Diameter ( mm ) Single Phase ( $m$ is omitted for three-phase) Standard Centrifugal Pump

## Flange Dimensions

## Installation Sketch <br> up to 7.5 kW included

## Installation Sketch

From 7.5 kW

\section*{| Connectors |
| :---: |
| on request |}

## Application

It is widely used for

- Pressure boosting for domestic water supply
- Floor heating system
- Solar pumping system

## Pump

- Automatic pressure boosting
- Anti-rust cast iron pump body
- Noryl impeller with heat resistance up to $150^{\circ}$
- $99 \%$ alumina ceramic shaft
- Liquid temperature: $2^{\circ} \mathrm{C}-60^{\circ} \mathrm{C}$

## Motor

- Insulation class: H
- Protection class: IP42
- $99 \%$ alumina ceramic bearing
- Copper winding

## Dimension Drawing

Identification Codes

ERP 15-90A/160

## Application

- It is widely used for heating ventilating and air conditioning
(HVAC) circulation, pressure boosting of hot water in family, homes powered by solar energy, industrial auxiliary equipment cold and hot water circulation and so forth
- Water circulation for the central and district heating system
- Domestic hot water circulation

## Pump

- Bronze or anti-rust cast iron pump body
- Noryl impeller with heat resistance up to $150^{\circ} \mathrm{C}$
- $99 \%$ alumina ceramic shaft
- Liquid temperature: $2^{\circ} \mathrm{C}-110$

## Motor

- Insulation class: H
- Protection class: IP44
-99\% alumina ceramic bearing
- Three speed motor

## Pressure Switch

## Pressure Gauge

- Two connection types: (1)G1/4" (2)M10×1
- For 40 mm gauge, the scale: $0-6$ bar
- For 50 mm gauge, the scale: $0-6$ bar or $0-10$ bar or 0.12 bar
- Backkootom connection

Float Switch
